organize The first national forum in presence
and remotely:

Cybersecurity policies

In Algeria in light of current
developments: challenges and stakes

Sunday , April 28, 2024

The supervising staff

- **Honorary President:** Prof. Yahi Mostapha,
Director of the University of Boumerdes
- **General Supervisor:** Prof. Bensgheir Abdeladhim,
Dean of the Faculty of Law and Political Science
- **General Coordinator:** Prof. Amrouche
Abdelouahab, Laboratory Director
- **Presidency of the National Colloquium:** Dr.
Bousba Soulef
- **Presidency of the Scientific Committee:** - Dr.
Deriadi Hamida- Dr.Hadjadj Mourad
- Presidency of the organizing committee:**
Dr Blahda Hanane Pr.Bourache chafia

Preamble of the National Colloquium

The penetration of media and communication technologies and their integration into all fields created a cyberspace with new dimensions, establishing a virtual location for actors and virtual interactions. This created new types of security threats that had to be responded to in a way that differed from what was previously known in the security field, embodied in what was termed cybersecurity. Accordingly, many countries have developed national policies and strategies to keep pace with developments in this field.

In this context, Algeria, like other countries in the world, seeks to position itself within cyberspace by confronting these security threats at their multiple levels and in their renewed manifestations, and by trying to overcome the challenges presented, whether at the technical, legislative or institutional levels, through cyber response and resilience policies, and planning to develop " A national strategy for information systems security.

Therefore, research into these topics becomes a necessity imposed by the rapid changes in the field, which are fueled by new technologies, most notably artificial intelligence, thus forming one of the most difficult challenges in the digital sovereignty equation in cyberspace.

Forum objectives:

- 1) An attempt to conceptually root the phenomenon in light of the conceptual chaos arising from the implications of applications of media and communication technologies.
- 2) Shedding light on Algeria's policies in the field of cybersecurity through legislation and laws taken in the field and through the agencies and institutions entrusted with the task of achieving and maintaining it.
- 3) Insight into Algeria's geopolitical position in cyberspace in light of existing digital threats.
- 4) Highlighting the challenges presented in light of the technical developments taking place (digitization, artificial intelligence, the Internet of Things, big data, augmented reality... etc.)
- 5) Providing an analytical vision that monitors the strengths to support and stabilize, and the weaknesses and shortcomings to overcome, according to a comprehensive perspective.

Forum problem:

The problem of the forum is established to examine this given within cyberspace, by trying to analyze these variables, extract their various dimensions and manifestations, and monitor various emerging threats and challenges presented. To what extent can cybersecurity policies in Algeria respond to the internal and external challenges presented and overcome the existing bets in cyberspace?

Axes of the national forum

The first axis: A theoretical, conceptual approach to the topic (cybersecurity in light of new developments).

The second axis: The legislative, legal and institutional framework for cybersecurity in Algeria.

The third axis: Cybersecurity in Algeria: between the general trend and the existing reality.

The fourth axis: Internal and external challenges and the technical and geopolitical stakes before Algeria achieving its cybersecurity.

The fifth axis: forward-looking visions for building a cybersecurity strategy in Algeria.

Important appointments:

The deadline for sending the complete article

30/03/2024

Responses Endorsing Accepted Articles

05/04/2024

The date of organization of the national colloquium

28/04/2024

Research paper requirements:

- ✓ The intervention must not have been published or previously shared.
- ✓ The research paper must be written in one of the languages: Arabic, French, or English, while respecting scientific regulations, and its number of pages should be from 10 to 15 pages.
- ✓ The entire research paper is sent in a "Word" file, simplified Arabic font, size 14 for the body and 12 for the margins.
- ✓ The forum will be held in presence and virtually via video lecture technology.

Members of the organizing committee

- Bounaceur brahim - Cherifi yacine – Ikaas fatima- Berkane nabila
Hanifi nadia- Ayache khadidja- Bendjadou Asma

Members of the scientific committee
