A national forum is being organized in
person and via videoconference.

The role of the economic public sector in achieving sustainable development Wednesday 23/04/2025

The committee overseeing the
scientific conference:

The honorary president: Mr. Yahi
Mostepha. The university president.

The general supervisor: Dr. Benseghier
Abdeladhim. Dean of the faculty

Head of Department: Dr. Al-Orfi
Fatima

President of the national forum: Dr.
Chemoune Aldjia

Preamble

Since independence, the Algerian state has focused on the economic sector, shaping and driving it to play a significant role in achieving development, which had repercussions on the social and political aspects. It adopted a socialist economic approach based on state ownership of the means of production and the adoption of a public monopoly policy for various economic activities, relying on the public economic institution, which took several forms during this phase to implement the development plan and meet the essential needs of the citizens.

In order to succeed the public economic sector and ensure its sustainability, many reforms were initiated, especially providing financial support. However, the economic and financial crisis of the late 1980s prompted the Algerian state to adopt comprehensive economic reforms, including re-evaluating the management of the public economic sector and adopting a liberal approach as an alternative to the socialist one, based on the principle of free trade, investment, and entrepreneurship. This was achieved by opening up initiatives for the private sector to engage in economic activities after liberating them from public monopoly, making it a key player in building the national economy and achieving sustainable development. The intended goal of these reforms was to drive the public economic sector to achieve economic efficiency and meet the desired objectives. However, to this day, it still faces significant financial problems and has not been able to achieve the set results. With the revolution in information and communication technologies and the trend of countries towards a knowledge-based or post-knowledge economy through investment in innovation and creativity, we wonder about the feasibility of continuing to rely on the public economic sector in light of the developments in information and communication technology.

Accordingly, the seminar's issue revolves around: the effectiveness of the public economic sector in achieving economic goals under the adoption of the liberal system and how it can contribute to achieving sustainable development in the context of the information and communication technology revolution.

Objectives of the forum

1. Understanding the concept of the public economic sector and distinguishing it from the private sector.
2. Familiarity with the various institutions that make up and constitute the economic public sector, as there is no clear legal text defining the individuals of the economic public sector.
3. Addressing the emergence of the public economic sector, the various reforms it has undergone, its current status, and the bodies responsible for its management.
4. Highlighting the oversight of the economic public sector, especially the financial oversight by the Court of Auditors for financial support, as well as the volume of public investments, which have only achieved low rates of return.
5. Diagnosing the main obstacles and problems that prevent the public economic sector from playing a role in sustainable development.
6. Study of the opportunities for the survival of the public economic sector in light of the developments of the information and communication technology revolution and the shift towards a knowledge economy.

National Forum Topics

Axis One: The Conceptual Framework of the Economic Public Sector .

The second axis: The development of the public economic sector in Algeria .

The third axis: Mechanisms for managing the public economic sector in Algeria .

Axis Four: Oversight of the Public Economic Sector .

Axis five: The obstacles faced by the public economic sector in achieving sustainable development and ways to address them .

Axis six : Opportunities for the survival of the economic sector in light of the shift towards a knowledge economy .

Conditions of intervention

- The subject of the intervention should be characterized by originality
- The topic of the intervention should fall within one of the axes of the study day, and it should be precise and avoid general topics that do not raise real issues.
- The number of pages in the research paper should not exceed 15 pages.
 - Only individual interventions are accepted.
- Interventions are accepted in Arabic, French, and English. The following standards should be observed in writing: In Arabic, size 14 for the main text and 12 for the margin in Simplified Arabic font, with footnotes automatically generated at the end of each page. For foreign languages (French or English), size 12 for the main text and 10 for the margin in Times New Roman font.

- The intervention form should be sent to the following email address: a.chemoune@univ-boumerdes.dz

Chairman of the Organizing Committee: Al-Arabi Belhaj
Members of the organizing committee

Dr. Sedra Wassila..... University of Boumerdes
Dr. Ben Saria Souad..... University of Boumerdes
Dr. Touati Nasira University of Boumerdes
Dr. Chemoune Aldjia..... University of Boumerdes

The technical committee of the scientific symposium
Chair of the technical committee: Dr. Boutaba Mourad
Members of the Technical Committee

Dr. Sedra Wassila Université de Boumerdes
Dr. Ben Saria Souad..... University of Boumerdes
Dr. Chemoune Aldjia..... University of Boumerdes

Important dates:

Reception of interventions from 09/03/2025 to 09/04/2025
The response to accepted interventions and confirmation of participation will begin from:15/04/2025.
